CC800DW	**Corsair Obsidian Series** 800D

Intro Phrase / Tagline	**Brilliant Design, Inside and Out**
Ad Copy – Print / Web	**A fully-featured full tower for real builders** The Obsidian Series 800D full tower chassis is designed from the ground up with enthusiast builders in mind, the 800D features a number of customizations that make building a high-performance PC easier than ever. A four-drive SATA hot-swap drive bay sits in the front of the case, making it easier to install or swap hard drives on the fly. A unique cable routing system virtually eliminates cable clutter that can impede airflow. Three separate cooling chambers provide optimum isolated cooling zones for your hard drives, graphics cards, and power supply. All this is quietly cooled by three included 140mm fans, with room for up to four more 120mm fans, including the triple 120mm radiator friendly top exhaust panel.

CORSAIR®

CC800DW

Corsair Obsidian Series 800D

Features

	Hot-swap drive dock and SATA backplane for up to four 3.5” SATA hard drives.
	Keep your components cool with three built-in fans and the ability to add four more.
	Tool-free optical drive installation makes building your new rig easy.
	Three 120mm fan mount locations take the work out of adding a radiator or extra airflow.
	Access your hardware faster than ever with one-touch side panel removal.
	Install or upgrade your CPU heatsink quickly with the easy-access backplate cutout.
	Optimize airflow and keep your system neat and tidy using the intelligent cable management system.
	Front panel includes access for FireWire, Headphones, Mic, and four USB ports.
